

670SJ SELF-LEVELING BOOM

OPTIMIZED FEATURES

BACKLIT LCD DISPLAY

Tablet-sized control panel displays real-time operational and performance data to help you better understand the machine day or night.

DRIVE AT FULL HEIGHT

Full functionality at full height allows you to drive, operate and raise the limits of your productivity while fully elevated.

CLASS-LEADING HEIGHT AND REACH

The platform elevates to a best-in-class 67-ft and delivers an equally impressive horizontal reach of 57-ft.

THREE MODES OF OPERATION

Self-leveling, standard travel and shipping modes ensure peak transportability on site or on the road.

UNPRECEDENTED PLATFORM STABILITY

Designed with the operator in mind, advanced stabilization technology reduces platform movement and lowers the risk of objects bouncing around or falling out.

ADVANCED CONTROL SYSTEM

A fully integrated system that continuously monitors the load, wheels and level of the frame in real time and automatically adjusts for optimum performance.

INDEPENDENT CONTROL ARMS

Each wheel independently follows the contours of the terrain and stays in constant contact with the ground, improving traction capability.

REVOLUTIONARY SELF-LEVELING CHASSIS

The ability to work on slopes up to 10 Degrees in any direction virtually eliminates prep work like cribbing and grading, putting you closer to your work area quicker.

MASTER YOUR TERRAIN AT SELFLEVELINGBOOM.COM
